

Jeff Crawford of the Maine D.E.P. Bureau of Air Quality;

Climate change driven by our emissions of CO2 and other greenhouse gases is already having negative effects in Maine. Without strong, immediate action our natural resources will be devastated, our health will suffer, and our economy will follow close behind. The time has come to wean ourselves of fossil fuels, and your agency is empowered to play a key role.

I understand that the DEP will be holding a public hearing to address rulemaking under Maine's climate protection statute (38 M.R.S.A. §576(3)). Please **notify me** of the date, time and location of the hearing at

email address

Thank you.
